

CANDIDAT AG 17/02/2025

Your First Name + SURNAME: O'Connor Kevin

Campus de l'école/School's campus: Berkendael

Classe de vos enfants/Your Children class: P5EN and P2EN

Profession/Occupation : Case Handler DG Competition

Your current commitment within the APEEE and/or the APEEE Services

- Class Representative since 2021
- Member of a management committee, which one? Transport since 2024
- Member of **APEEE Services Board of Directors?** Yes since 2023
- What are your motivations for joining the APEEE Services Board of Directors ?
 - Having served on the APEEE Services Board for the past two years, I remain strongly motivated by my desire to improve the operations of APEEE Services. My experience as an active and constructive board member has reinforced my belief that efficient, transparent, and democratic governance is essential for delivering high-quality services to the school community.
 - In particular, my involvement as an observer on the Transport Committee has helped me contribute to understanding how mobility in the school currently works and how to improve it. I recognise the need for strong leadership at the decision-making level to ensure that transport services are safe, reliable, and sustainable. I have actively contributed to discussions on mobility policy and have pushed and am still pushing for the electrification of the bus fleet, a project that is crucial to improving the health of our kids and reducing pollution in Brussels.
 - I am committed to ensuring that our services adapt efficiently to changing circumstances and continue to meet the needs of students, parents, and staff.

- What is the experience/added value you can bring?

With two years on the board, I have gained valuable insight into how APEEE Services operates and have actively contributed to key projects. As a very active observer of the Transport Committee in pushing for the electrification of the bus fleet, I have learnt much about mobility policy in the school and the Brussels region in general. As an experienced Commission official in the field of energy and environment, I believe I have some expertise to bring to bear to steer the services in the area of mobility I have also advocated for more transparency and inclusivity in decision-making, ensuring that parents stay informed and engaged. I look forward to continuing this work, helping APEEE Services become more resilient, efficient, and sustainable for our school community.
